EDUCATION

- Bangalore Institute of Technology** Bengaluru, India
 - Bachelor of Engineering - Robotics and Artificial Intelligence; GPA: 8.6* Dec 2022 - June 2026
 - Courses: Natural Language Processing, Data Structures, Computer Networks, Artificial Intelligence, Machine Learning*

SKILLS SUMMARY

- Languages:** C++, JavaScript, SQL, C, Python
- Frameworks:** NodeJS, ReactJS, ExpressJS
- Tools:** Kubernetes, Docker, GIT, Supabase, MySQL, MongoDB
- Platforms:** Linux, Web, Windows, AWS
- Soft Skills:** Leadership, Event Management, Public Speaking, Time Management

EXPERIENCE

- Joint Secretary - Rotaract District 3191** July 2024 - June 2025
 - Student (Full-time)*
 - Role:** Worked as the Joint Secretary of the Rotaract Club of Bangalore Institute of Technology.
 - Responsibilities:** Helped in maintaining club work and supported organizing different club events.

PROJECTS

- Chrome Tab Color - (Browser Extension, UI/UX Enhancement):** A Chrome Extension that lets users assign colors to different tabs for better categorization based on priority/work. **Tech:** HTML, CSS, JavaScript, Chrome API.
- SaaS Sentry - (Backend Development, Cloud Monitoring System):** Developed a scalable backend system to monitor cloud resource usage and costs, integrating AWS services like EC2 and CloudWatch with automated cron jobs for tracking and alerts. Implemented secure authentication using JWT and bcrypt. **Tech:** Node.js, Express.js, TypeScript, Prisma, Supabase, AWS, React.
- Chess Game - (Web Development, Real-Time Systems):** Built a real-time multiplayer chess platform with WebSocket-based communication, enabling live gameplay and spectator mode. Designed a fully responsive UI without external frameworks. **Tech:** HTML, CSS, JavaScript, Bootstrap, Node.js, Express.js, Socket.io.
- Gesturely - ASL Translator (Computer Vision, Deep Learning):** Developed a real-time American Sign Language recognition system using a fine-tuned MobileNet model, capable of processing both image and video inputs via an interactive Streamlit application. **Tech:** Python, PyTorch, OpenCV, Streamlit, MobileNet, Gemini API.
- Smart Bookmarks - (Full-Stack Web Application, Real-Time Systems):** Built a secure, real-time bookmark management platform with Google OAuth authentication, enabling users to organize and access links with tag-based categorization across devices. Implemented Row-Level Security (RLS) for user-isolated data access and integrated Supabase Realtime for instant UI updates without polling. **Tech:** Next.js (App Router), TypeScript, Supabase (PostgreSQL, Auth, Realtime), Tailwind CSS, Vercel.

CERTIFICATIONS

- JNCIA – Cloud Certification (Cloud Computing, Networking):** Industry-recognized certification by Juniper Networks validating foundational knowledge of cloud infrastructure, networking concepts, and deployment models. **Tech:** Cloud Architecture, Networking Fundamentals, Virtualization (2025).
- JavaScript (Intermediate) - HackerRank (Problem Solving, Algorithms):** Demonstrated proficiency in intermediate-level JavaScript concepts including closures, higher-order functions, and algorithmic problem solving. **Tech:** JavaScript, Data Structures, Algorithms (2024).

ACHIEVEMENTS

- Software Engineer Intern Certificate (Problem Solving, SQL, Software Engineering) – January 2026
- Smart India Hackathon: Participated in SIH 2024 and SIH 2025; successfully qualified for the first level.
- HackerRank SQL Gold Badge: Achieved Gold level (670+ points).
- Solved 500+ DSA problems across LeetCode, GeeksforGeeks, and CodeChef .

VOLUNTEER EXPERIENCE

- Student Welfare & Skill Development Head at Robo Cell** Bangalore, India
 - Conducted offline technical & soft-skills training impacting over 300 students.* 2024–25
